#### **Why Use Organic Products on Your Lawn?**

You can help restore the health of the bay by using eco-friendly products on your lawns and in your gardens this spring, vs. synthetic fertilizers. Synthetic fertilizers contain more nitrogen than your lawn needs. What happens to all the unwanted, unused nitrogen? It goes into the bay and feeds the algae blooms that destroy the ecosystem of the bay. Spring not only brings May flowers, but also brings a spike in nitrogen and toxic chemical use on lawns. The good news is we can reverse this trend by using eco-friendly products on our lawns. Think feet and pet friendly!

**Pre-Order *ONLY* for Birdseed. Pre-Order *recommended* for Green Lawn products. Individual Green Lawn products available at both sales. PLUS, a Green Lawn Treatment Package!!**
